The Town of Gibsons assisted by KWL Consulting engineers are creating a conceptual design for the waterfront area between Gibsons' Wharf and Armours Beach.

The objective of the Gibsons Foreshore and Seawalk Improvements project is to propose a concept that will protect or enhance the environmental quality of the foreshore area, ensure the reliable long term provision of sanitary sewer service, and accommodate recreational use along the walkway.

The Foreshore and Seawalk Improvement Design Open House will present the results of the design charrette outcomes to the community.
